

Junior Full Stack Developer

TechNova Solutions | Ramallah, West Bank (Hybrid/Remote Considered) | Full-Time

Department: Engineering | **Experience Level:** Entry-Level (0–2 Years) | **Posted:** May 2026

About TechNova Solutions

TechNova Solutions is a fast-growing software company specializing in building scalable web applications for clients across the MENA region and beyond. Our team is passionate about clean code, modern technology, and delivering impactful digital products. We are looking for a driven and curious Junior Full Stack Developer to join our engineering team and grow alongside us.

Role Overview

As a Junior Full Stack Developer, you will contribute to both the front-end and back-end development of our web applications. You will work collaboratively with senior engineers, product managers, and designers to build, test, and maintain high-quality software. This role is ideal for a recent graduate or self-taught developer who is eager to gain real-world experience across the full development stack.

Key Responsibilities

- Develop and maintain responsive, user-friendly web interfaces using React.js or similar front-end frameworks.
- Build and integrate RESTful APIs using Node.js and Express (or equivalent back-end technologies).
- Write clean, readable, and well-documented code following team coding standards.
- Collaborate with designers to translate wireframes and mockups into functional front-end components.
- Work with databases (SQL and/or NoSQL) to store, retrieve, and manage application data.
- Participate in code reviews, providing and receiving constructive feedback.
- Debug and troubleshoot issues across the full stack in development and production environments.
- Contribute to sprint planning, daily stand-ups, and retrospectives in an Agile/Scrum environment.
- Write and maintain unit and integration tests to ensure code quality.
- Stay current with emerging technologies and proactively suggest improvements to workflows and tools.

Required Skills & Qualifications

- Bachelor's degree in Computer Science, Software Engineering, IT, or a related field — OR equivalent practical experience/bootcamp training.
- Solid understanding of HTML5, CSS3, and JavaScript (ES6+).
- Hands-on experience with at least one front-end framework or library (React.js preferred).
- Basic knowledge of server-side development using Node.js, Python (Django/Flask), or a similar back-end technology.
- Familiarity with relational databases (e.g., MySQL, PostgreSQL) and basic SQL queries.
- Understanding of version control using Git and GitHub/GitLab.
- Ability to work independently and in a team, with strong problem-solving skills.

- Good written and verbal communication skills in English.

Preferred Qualifications (Nice to Have)

- Experience with RESTful API development and integration.
- Exposure to cloud platforms such as AWS, Google Cloud, or Azure.
- Familiarity with containerization tools like Docker.
- Knowledge of NoSQL databases such as MongoDB.
- Experience with testing frameworks (e.g., Jest, Mocha).
- Contributions to open-source projects or a portfolio of personal/academic projects on GitHub.
- Familiarity with Agile/Scrum development methodologies.

Our Technology Stack

Front-End: React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS

Back-End: Node.js, Express.js, Python

Databases: PostgreSQL, MongoDB

DevOps / Tools: Git, GitHub, Docker, AWS, Jira, Figma

What We Offer

- Competitive salary with regular performance reviews.
- Mentorship from experienced senior developers and structured onboarding.
- Opportunity to work on real-world, high-impact projects from day one.
- Flexible hybrid work arrangement with remote options.
- Access to online learning platforms and annual professional development budget.
- A collaborative, inclusive team culture that values continuous learning.

How to Apply

Submit your CV, a link to your GitHub profile or portfolio, and a brief cover letter explaining why you're excited about this role. Applications without a portfolio or GitHub link will not be considered.
